

Date 7/02/25

Medical Certificate

TO WHOMSOEVER IT MAY CONCERN

This is to certify that

Mr./Mrs./Miss Akshat Jain (M 21/M)

is / was under my treatment from 19/01/25 to 7/02/25

for ac. enteric fever >
.....

He / She is / was advised medical treatment and rest for this period.

He / She is medically fit to resume his / her duties W.E.F. 8/02/25

.....

Dr. Angad Singh Kochhar

Laboratory Test Report

Patient Name : Mr. AKSHAT	Specimen Drawn ON : 20/Jan/2025 10:25AM
Age/Gender : 21 YRS /M	Specimen Received ON : 20/Jan/2025 03:53PM
UHID/MR No : ADEL.0001737058	Report Date : 20/Jan/2025 04:18PM
Visit ID : MDEL1738185	Client Code : DL1995
Ref Doctor : Dr.ANGAD SINGH KOCHAR	Barcode No : C1424051
Client Name : KOCHAR CLINIC	Ref Customer : SELF

DEPARTMENT OF SEROLOGY				
Test Name	Result	Unit	Blo. Ref. Range	Method

SALMONELLA TYPHI IGG (TYPHI DOT)

Sample Type : SERUM

Salmonella Typhi IgG (Typhi Dot)	POSITIVE		Negative	Chromatography
---	-----------------	--	-----------------	-----------------------

Typhi dot IgG is rapid, qualitative sandwich immunoassay based on the principle of immunochromatography for the detection of IgG antibodies to S.typhi in human serum/plasma or whole blood specimen.

Note:

1. A low extent of cross reactivity may be observed with S. paratyphi infection.
2. Specific IgG may compete with the IgM for sites and may result in a false negative result.
3. High titre of rheumatoid factor may result in a false positive reaction.
4. However, if S typhi infection is still suspected, repeat the test 5-7 days later with a fresh sample.

SALMONELLA TYPHI IGM (TYPHI DOT)
Sample Type : SERUM

Typhi Dot (IgM)	POSITIVE		Negative	Immunochromatography
------------------------	-----------------	--	-----------------	-----------------------------

Typhi dot IgM is rapid, qualitative sandwich immunoassay based on the principle of immunochromatography for the detection of IgM antibodies to S.typhi in human serum/plasma or whole blood specimen. Detection of S.typhi specific IgM antibodies serve as a marker for recent infection.

NOTE:

- 1.A negative result does not rule out recent or current infection, as the positivity is influenced by the time elapsed from the onset of fever and immunocompetency of the patient .However, if S typhi infection is still suspected , repeat the test 5-7 days later with a fresh sample.
- 2.Specific IgG may compete with the IgM for sites and may result in a false negative result.
- 3.High titre of rheumatoid factor may result in a false positive reaction.
- 4.A low extent of cross reactivity may be observed with S. paratyphi infection.

To HOD(IT)

Bharati Vidyapeeth's College of Engineering,
Paschim Vihar New Delhi - 110063

Subject- Application regarding medical issue

Respected Sir,

I Akshat Jain student of Bharati Vidyapeeth's College of Engineering IT-3rd year (01411503122) would like to inform you that I was not able to attend college classes and labs because I was suffering from typhoid fever from 19/01/25 - 7/02/25.

I would try to maintain a total of 75% attendance further.

Yours Truly
Akshat Jain
(IT-1 3rd year)
